Now offers the investing public a limited number of shares of its capital stock at per value, one dollar per share, in blocks of not less than ten shares, to be used for development purposes. This proposition will be held open for a limited time, and all subscriptions may be made to any of the below-named directors, stockholders or agents, accompanied by cash or exchange, and should the offering be oversubscribed, the first applications received will take precedence.

PROPERTIES OF THE TRENTON ROCK OIL COMPANY Are the most valuable and positive oil lands undeveloped in the famous Beaumont oil district, the company having been offered \$5,000 for a single acre of its holdings. The investing public is assured that the properties will be immediately developed and that contracts are now made and others being closed for the boring of wells. The holdings of Trenton Rock Oil Company have tripled in value since their purchase. This stock, on account of the close proximity of the holdings of the company to the gushers, will advance rapidly.

Trenton Rock Oil Stock Is a Sure Winner for the Following Reasons: First—A glance at the personal and business connection of the directors and stockolders is a guarantee of this company being intelligently handled and is the very
est offer in the oil field and the first well brought in many million dollars profit.
Second—Our properties consist of 25% acres owned in fee simple, situated closer
han that of any other company offering stock. We are near the Higgins, Lucas and
suffey Gushers. This tract of land is directly over the oil lake, and wells will be
simk on this property as fast as man and money can do it. The Trenton Rock Oil
company owns its own drilling machinery, the very best and stest improved, has exsert drillers, and every holding of the company will be developed.

TO SHOW ACTIVITY.

PRICES CONTINUE FIRM WITH BUT LITTLE TRADING.

Wabash Attracting Attention on Account of Its Favorable Position in Consolidation.

REPUBLIC SPECIAL.

New York, May 22—Trading in American stocks in London was very narrow in the earlier part of the day, but took on more activity toward the close. It was said that activity toward the close. It was said that the Stock Exchange Committee there fixed May II for the delivery of Northern Pacific. The problem of what to do in regard to the options open in the stock is still pussing the London market and probably causing liquidation all around. There were no changes of moment in the general list and consols remained the same at \$4. Money and exchange presented no features of interest.

and exchange presented no features of in-terest. In the local market the early trading showed a further contraction of business and the activity was mainly in the hard coalers, particularly Eric, and in the stocks interested in the forthcoming consolidation in the Northwest. The buying in Eric was noticeably good, more so as the Morgan people are not talking more than 1½ par-cent semiannual on the first preferred. Mis-souri Pacific and Wabash issues both showed signs of purchases for the pool. The probable position of the Wabash is exciting a good deal of interest, and it is claimed that it forms a most important part in the yet unpublished Gould scheme. Union Pacific sold off early and railled very easily.

Money continued very easy at 460% per cent. The volume of trading frequently showed a further falling off. The opera-tions in the loan crowd indicated a consider-able short interest, especially in South-western stocks.

LOCAL MOREY MARKET.

Attorney at Law, Tyler, Texas. G. M. D. Grigsby, Prest. Texas, Sabine Valley and Northwestern Rallway Co., Jefferson, Texas. Authorized Capital Stock \$1,000,000, Divided Into 10,000 Shares of One Hundred Dollars Each. MONASSESSABLE

C. H. ALEXANDER, Vice Prest. and Gen'l Figr.

\$300,000 Will Be Issued at Once, \$60,000 of Which Has Been Set Aside for and Credited to Improvement and Development Account.

This \$300,000 of stock is based on one hundred acres of land located four miles south of the gushers, ten acres one and three-quarters miles northwest of the gushers, and one hundred acres four miles northwest of the gushers. There are 30 or 40 derricks in sight of the ten-acre tract, and all this land is in the proven oil district. In addition to the 210 acres of leased lands above mentioned, this company owns in fee simple 30,000 acres of land in the recognized oil district of Texas. We have four up-to-date well-drilling outfits that we will put in the field by June 1 and we are going to develop these lands at once. The titles to all our lands have been passed upon and pronounced good by Duncan and Jones, attorneys, of Tyler. Tex.

We own the perpetual mineral and timber rights in all these lands, and if no oil is found outside the proven district, the company can still sell its fee simple lands for farm, stock and fruit-growing purposes, together with the timber thereon, for the amount of the \$300,000 stock to be issued at this time, less a reasonable deduction of, say, from 20 to 25 per cent, which will be spent in drilling wells and developing the oil and mineral rights of the property. A portion of this stock is offered to investors at par. Three hundred thousand dollars is all that will be issued at present, and every dollar of this goes for the purpose of purchasing the lands, developing them and obtaining the leases. The seven hundred thousand dollars of treasury stock will not be used for any purpose, except the acquirement of additional lands, obtaining additional leases, the purchase and equipment of refineries, smelters, laboratories, pipe lines, etc., and all expenditures from this fund of treasury stock will be under the supervision and control of the Board of Directors.

In a nutshell, our proposition is this: If we strike oil or minerals in paying quantities, here is our profit. If we defend that the supervision and control of the Board of Directors.

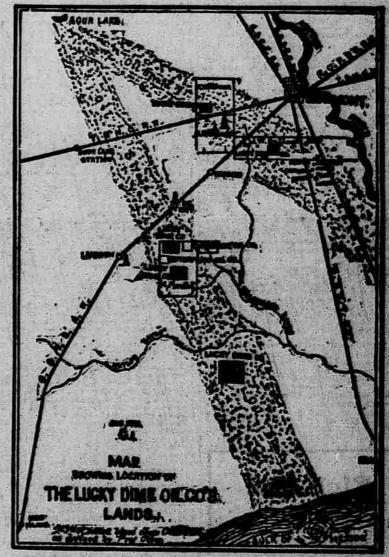

Do you know of any other company that can make this statement? For further information and pa
